ABOUT ME

Before turning my passion into a professional goal, I took my first steps as a self-taught developer. Curious and passionate, I've always wondered how computers worked, what was the logic behind it.

I participate as often as possible in workshops, conferences and hackathons. It's a great way to share and learn, especially in a field as evolving as Software Engineering. I was also able to take my first steps as a speaker at the Paris Open Source Summit 2019. I hope to be able to repeat this first experience by sharing my passion for the Open Source world. Each week I also take part in meet-ups with some teammates to learn new programming stuff that I try to share through my blog.

TECHNICAL SKILLS

Programming

TypeScript	Cloud computing
React JS	DevOps
GraphQL	Flux pattern
Git	Functional programming
ReasonML / OCaml	Reactive programming
Python	Architecture - Design Patterns
Docker	TDD - BDD

Langages

- English: professionnal
- French: native

Team work

- Agile (Scrum - Kanban)
- (Mob - Pair) Programming

HOBBIES & INTERESTS

Writing | Workshops Meetups | Programming | Artificial Intelligence

OPEN SOURCE COLLABORATION

- **Backstage** - Spotify
- **Docusaurus** - Facebook
- **Rome** - Facebook
- **MDN web docs** - Mozilla

OTHER EXPERIENCES

Competitive programming
Google Code Jam - Facebook Hacker Cup - MDF
Code and debug quickly and efficiently
Improve my analytical skills
Manage time and stress
Split and organize my work effectively
